Security Forum in Krakow will be held for seventeenth time. At the same time it is sixty third scientific conference organized by international scientific society CICA which deals with aggression studies (both in its personal and structural scale).

LXIII CICA - XVII Security Forum will be taken at the difficult time of war in Eastern Europe. We are witnesses to variable socio-political reality and we reasonably hope that the crisis will be defused.

The conference is held under the patronage of the Rectors of universities important for security research and the Presidents of two scientific societies:
